

# Welcome

## Teddy Bears: Infant Room

Age 3 months – 12 months

Lead Teacher: Rachel Sagesse

Assistant Teacher: Joann Hutchinson

\*We strive to provide you and your baby with a happy, healthy learning environment. We provide growing experiences throughout the day and follow the routine your child is comfortable with.

\*In the Infant Room we have different types of activities to promote crawling, standing, reaching, grasping, etc.

\*Infants will have daily gross motor activities outdoors in our play yard twice a day for 30 minutes with weather permitting. We also take frequent buggy walks on campus.

\*The infants will have many planned opportunities for story time, singing and music.

\*Parent Involvement:

-Each day your child will go home with a Daily Report. This sheet is our way of letting you know what your baby did on any given day: diaper changes, feedings, nap times, and any activities. This is also our way of letting you know of any materials you may be running low on and need to provide more, such as diapers and wipes, bibs, etc.

-Feeding and nap schedules are bound to change, therefore it is important that you keep them updated as your baby grows.

\*We will periodically ask you to bring in items for a project, such as an empty plastic container, or family photos in order to build a comfortable nurturing environment for your child. Your cooperation is appreciated.

\*REMEMBER: you can always contact us at 718-667-2604 between 12 and 2.
